DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

2. Claims 13-26 are allowed.

3. The following is an examiner's statement of reasons for allowance: This invention deals with a three-dimensionally shaped flat cable comprising: a laminate including at least one conductor track enclosed between two insulation layers, an adhesive layer, and at least one support layer, the support layer connected to at least one of the insulation layers via the adhesive layer, the laminate being applied to a positive die and shaped by applying one of heat, radiation and pressure and fixed in a three-dimensional shape by cooling to below the glass transition temperature of the adhesive layer or by hardening the adhesive layer (claim 13). This invention also deals with a method for manufacturing a dimensionally stable flat cable comprising: applying to a positive die, adjusted at room temperature, a laminate, the laminate including (a) a conductor track enclosed between two insulation layers, (b) an adhesive layer, and (c) a support layer connected to at least one of the insulation layers via the adhesive layer, each of (a), (b) and (c) defining a laminate component, or applying a positive die separately to all components for the laminate, and shaping the laminate or the components with the aid

of at least one of heat, radiation and pressure; and fixing the laminate or the component shape by cooling to below the glass transition temperature T_g of the adhesive layer or by hardening the adhesive layer (claim 22). This invention also deals with a three-dimensionally shaped flat cable comprising: a laminate including a flexible flat cable, an adhesive layer, and at least one support layer, the support layer connected to the flexible flat cable via the adhesive layer, the laminate being applied to a positive die and shaped by applying one of heat, radiation and pressure and fixed in a three-dimensional shape by cooling to below the glass transition temperature of the adhesive layer or by hardening the adhesive layer (claim 25).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments filed January 28, 2008 have been fully considered and they are persuasive. Specifically, the applicant argument that "None of the cited prior art teaches or suggests a laminate including at least one conductor track enclosed between two insulation layers, an adhesive layer, and at least one support layer, the support layer connected to at least one of the insulation layers via the adhesive layer, the laminate being applied to a positive die" is persuasive and therefore the claims have been allowed.
